SUMMARY

B.Tech CSE student (2028) and founder of Kairo Technologies, maker of Kairo Cloud OS, Kairo Orbit and PAIR. AI engineer shipping production LLM, RAG, agent and voice-AI systems; vLLM and Laya AI contributor; 1st place at Syntax2Code.

EDUCATION

B.Tech, Computer Science (CSE) | **G. Pullaiah College of Engineering and Technology** 2024 – 2028 (Expected)

EXPERIENCE

Founder & CEO | **Kairo Technologies** | **thekairo.tech** Oct 2026 – Present

- Founded Kairo and lead its three products: **Kairo Cloud OS** (thekairo.dev), **Kairo Orbit** (orbit.thekairo.dev), which runs your Mac from iPhone or Android with an AI operator, and **PAIR** (pair.thekairo.dev), pet matchmaking.
- Architected Cloud OS (PTY terminal, code editor, persistent workspaces): a 12-package monorepo (35+ APIs, Express, Prisma/PostgreSQL/Redis) that offloads compute to Docker/Kubernetes and remote GPUs.

AI Engineer | **Sync AI Technologies Pvt. Ltd.** | **Remote** Aug 2026 – Present

- Build LLM features on OpenAI, Gemini and Groq models with function calling and structured JSON outputs.
- Develop RAG pipelines (Qdrant, pgvector, LlamaIndex) and LangGraph agents served as FastAPI services with Redis and Celery; ship via Docker and GitHub Actions.

Team Lead Intern, Backend & System Architecture | **RMJ IT Solutions (MicroIntern)** | **On-site** Jul 2026 – Present

- Lead the development team for MicroIntern, an AI hiring platform: plan sprints, assign tasks and ship releases.
- Designed the backend APIs and database schema; built AI resume parsing, assessment generation and candidate scoring, with automated testing and deployment.

Consultancy Project Lead | **Vensora AI Innovations Pvt. Ltd.** | **Remote** Jul 2026 – Sep 2026

- Built an AI voice customer-support platform for logistics: LangGraph agent with Groq and Qdrant (BGE-M3), Faster Whisper STT, Piper TTS and Asterisk (SIP/RTP) telephony.
- FastAPI/PostgreSQL/Redis backend, Next.js frontend, Prometheus and Grafana monitoring; earned a Letter of Appreciation from the CEO.

Web Development Intern | **RootedLabs** | **Remote** May 2026 – Jul 2026

- Built and deployed the company website (rootedel.com) and was main developer of its AI learning platform for students, teachers, parents and school admins.

OPEN SOURCE

vLLM | **High-throughput LLM serving engine** | **Contributor** Sep 2026

- Optimized collectives in Tensor Parallel Mixture-of-Experts (MoE) cases using torch.compile (PR #54611).
- Fixed KV cache group sizing logic for arbitrary hybrid models (PR #54613).

Laya AI | **Non-autoregressive LLM decision-routing engine** | **Contributor** Sep 2026 – Present

- Authored PR #127: per-language temperature calibration at the logit-scaling step, fixing overconfident Chinese and non-English routing; added a Chinese eval harness (#124).
- Built a FastAPI server and CLI with concurrent requests and CI (#125, #119, #114); fixed an email-parser bug (#115).

PROJECTS

StakeUp | **Next.js, FastAPI, PostgreSQL, Llama 3.2 Vision** 1st Place, Syntax2Code

- Led a team of five to build an AI accountability app in 24 hours: vision-LLM task checks, AI planner, escrow wallet.

HomeProof | **React Native, FastAPI, YOLOv8, OpenAI, Gemini, Sarvam AI**

- Property inspection app: YOLOv8 finds structural damage; LLMs write inspection reports; regional-language voice input.

Sonic Bridge | **React, Node.js, WebSockets, speech AI**

- Live translation that streams one speaker to many listeners in under 6 seconds, with noise suppression and VAD.

TECHNICAL SKILLS

AI / LLM: OpenAI, Gemini, Groq, LangChain, LangGraph, LlamaIndex, RAG, Qdrant, pgvector, PyTorch, vLLM
Vision & Speech: OpenCV, YOLOv8, vision-language models, Faster Whisper, Piper TTS, Sarvam AI, Asterisk
Backend & Frontend: FastAPI, Node.js, Express, WebSockets, Redis, Celery, PostgreSQL, MongoDB, React, Next.js
Languages & Infra: Python, TypeScript, JavaScript, SQL; Docker, Kubernetes, GitHub Actions, Prometheus, Grafana

AWARDS & CERTIFICATIONS

- **Hackathons:** 1st Place, Syntax2Code 2026 (internship award) | 2nd, TechXplore 2026 | 3rd, NEXORA 2026
- **Certifications:** Oracle OCI Generative AI Professional; Google Cloud Generative AI Leader; NVIDIA Deep Learning
